# USER'S GUIDE

## CLOSING

Press the button  , insert a 4 digits code and press the button .

The led will shortly flash 1 time every 2 seconds to indicate that the lock is closed

## OPENING

Press the button .

Digit the choosen code for closing and press the button .

## OPENING WITH PASSEPARTOUT CODE

Press the button .

Insert the 6 digits passepartout code

**The company suggest the change of passepartout code set by factory and inform about it to the authorized personnel only.**

## CHANGE OF PASSEPARTOUT CODE

With the lock "open" press the button  and release it later only after that led has issued 2 short flashes and 1 longer.

Insert the 6 digits passepartout code in use and press the button  .  
If the passepartout code is correct, the led will turn on for 3 seconds.

When the led turns off press the button .

Insert the new 6 digits passepartout code and press the button .

If the new passepartout code has been correctly inserted, the led will turn on for 3 seconds.

After having executed these operations, it is advisable to check and open the lock with the new passepartout code.

## TIMER SETTING

By inserting the timer, the lock will open after an established time everytime it is closed.

To set the timer please follow the instructions below:

With the lock "OPEN" press the button  and release it only after the led has issued 2 short flashes and 1 longer.

Insert the 6 digits passepartout code in use and press the button .

If the passepartout code is correct, the led will turn on for 3 seconds.

When the led turns off press the button .

Insert after how many hours the lock must automatically open by using the numeric keyboard (from 1 to 99 hours) and press the button .

For disconnecting the timer proceed as above and insert "0" as value of the hours.

*Example: If you wish the lock opens after 8 hours press the button 8 and the button  .  
If you wish the lock opens after 12 hours press the button 1, the button 2 and the button .*

The led will shortly flash 2 times every 2 seconds to indicate that the lock is closed with the timer "ON".

## READ CAREFULLY

### FEW INSTRUCTIONS AND SOME SUGGESTIONS TO KEEP EFFICIENT THE LOCKS

#### CLEANING

Clean the lock exclusively with a damp cloth.  
Avoid soap, solvents, alcohol etc.

**AVOID TO MAKE ENTER THE WATER IN THE LOCK**

*If the water gets inside the lock in addition to discharge the batteries can permanently damage the lock*

#### BATTERIES ( see page 5 )

When the batteries have not enough power to close the lock the led red turn ON and stays ON until the complete discharge of the batteries. ( approximately 3 days )

Replace them only with **ALKALINE** batteries ( AAA ) observing the right polarities.  
Do not use rechargeable batteries

*When you noted that the led is ON replace as soon as possible the batteries.*

*If the discharged batteries remain in the lock they could release some acid substances which damage the contacts*

#### PASSEPARTOUT CODE

When you have the need to change the passepartout code verify that the new passepartout programmed works correctly after the changing

*To avoid confusion is advisable to program the same code for all the locks installed.*

#### OBSTACLE ( see page 6 )

If during the closing ( or the opening ) the red led flashes quickly 8 times this means that the bolt has met an obstacle and it unable to close ( or open ).

*In this case remove the obstacle or verify that the door is well-aligned and adjust, if it necessary, the hinges of the door or the stop-bolt*

#### ATTENTION

**PLEASE NOTE THAT THE NON-OBSERVANCE OF THE RULES IN THIS GUIDE FOR A CORRECT MAINTENANCE WILL AUTOMATICALLY VOID EVERY KIND OF WARRANTY OF THE PRODUCT.**

# REPLACING THE BATTERIES

THE LOCK DOES NOT WORK AND THE RED LED  
IS "ON"  
or  
THE LOCK IS COMPLETELY INACTIVE

BATTERIES DISCHARGED

ALKALINE BATTERIES  
( 1,5 V - AAA )

USE ONLY **ALKALINE** BATTERIES

DO NOT USE RECHARGEABLE BATTERIES

IT IS RECOMMENDED TO REPLACE THE BATTERIES WITHIN 2 YEARS FROM THEIR INSTALLATION

***PAY ATTENTION***

IF DURING THE CLOSING PHASE THE BOLT HITS AGAINST THE STOP-BOLT AND IT DOES NOT CLOSE ( SEE FIGURE 3 AND 4 ) AFTER 3 SECONDS THE BOLT COME BACK IN THE POSITION "OPEN"..  
**THE REPETITION OF THE PROBLEM COULD DAMAGE THE INTERNAL MECHANISM..**

IF THE LOCK CLOSES BUT THE BOLT FORCES HORIZONTALLY AGAINST THE STOP-BOLT ( SEE FIGURE 2 ) THE CONSUMPTION OF BATTERIES DRASTICALLY INCREASES.

TO PREVENT SUCH DISAVANTAGES IT IS ADVISABLE TO KEEP A SECURITY AREA BETWEEN THE BOLT AND THE STOP-BOLT SO THAT THE FUNCTIONING IS PERFECT EVEN WHEN IT HAPPENS A FOULTY ALIGNEMENT OF THE DOOR.

# USO OF EXTERNAL POWER SUPPLY ( PFAESEL02 )

## EMERGENCY OPEN

Remove the protection glass and the label as shown in the picture.

With the external power supply commutator on " ON " position connect the two metal point in the proper holes paying attention to the polarity.  
For opening the lock keep the connected metal points, press the button  and digit the 6 digits passepartout.

# INSTALLATION GUIDE

1

Pic. (1.1)

Make on the door n.5 holes of 9 mm diameter.

To determine the horizontal positions of the holes refer to the picture 8.1 and 8.2 and make sure that the bolt of the lock correctly acts while closing and opening

2

Fig. (2.1)

Insert the keyboard on the door by slipping the cable through the central hole.

3

Pic. 3.1

After having removed the cover of the lock slip the cable through the proper hole placed on the back of the lock and insert it in the connector as shown in the picture.

4

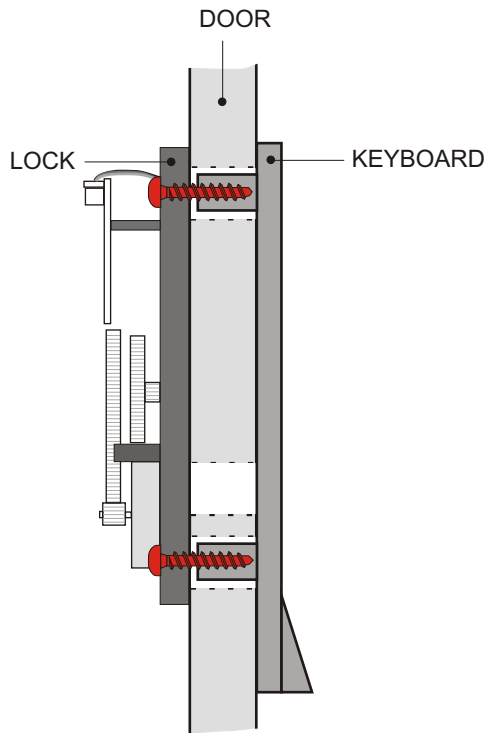

Pic. 4.1

Bend the cable as shown in the picture in such a way to set the wires between the lock and the door.

# 5

**Pic. 5.1**

Fix the lock and the keyboard to the door with n.4 screws for plastic materials, cylindric head, 4 mm diameter, 20 mm lenght

**Pic. 5.2**

The lenght of the screws ( L ) may change according to the thickness of the door and the further spacer\* used. In any case please make sure, that once fixed, the screws is between 3 and 6 mm from the frontal of the keyboard.

After having fixed the lock to the door, please close it with the cover by the two proper screws.

\* for the use of the spacer please see the paragraph n.6

# 6

## USE OF SPACER

Pic. 6.1

The spacer is an optional accessory to be used when you want to leave the body of the lock from the door.

Pic. 6.2

More spacers can be used for the door with reduced thickness.

# 7

## INSTALLATION OF THE NUMBER

Pic. 7.1

Insert the adhesive label\* in the proper space.

\* The use of AVERY L 6008 polyester 25,4 x 10 mm labels for laser white and black printers is recommended.

Pic. 7.2

Insert in the slot at the top of the protection glass.  
( take care of the exact position)

Pic. 7.3

Press where indicated by the arrow in order to hook the glass.

Pic. 7.4

Use a thin screwdriver to remove the glass and lever in the proper grooves.

**IMPORTANT : THE PROTECTION GLASS MUST BE INSERTED IN ANY CASE EVEN IF YOU DO NOT WISH TO PUT ANY LABEL ON THE FRONT OF THE KEYBOARD.**

# 8

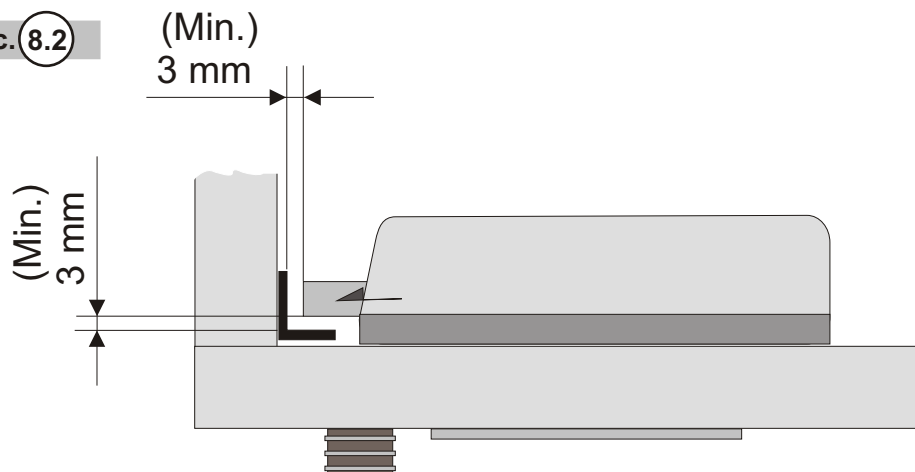

## QUOTE FOR LOCK FIXING
